#### 1. Product and Company Identification

#### 1.1. Product identifier

Trade name

## DEGAROUTE® 460 Binder Resin

Solution of an acrylic polymer in methacrylic acid esters / acrylic acid esters

#### 1.2. Recommended use of the chemical and restrictions on use

Recommended use(s): binder for road marking

Non-recommended use(s): None known.

#### 1.3. Details of the supplier of the safety data sheet

Evonik Corporation USA 299 Jefferson Road Parsippany, NJ 07054-0677 USA

973-929-8000 973-929-8040 (fax)

product-regulatory-services@evonik.com

Product Information Number	973-929-8060
24 Hour Emergency Number, CHEMTREC	1-800-424-9300

#### 2. Hazards identification

#### 2.1. Classification of the substance or mixture

This mixture is classified as hazardous according to US-GHS.

#### Classification according to Regulation 29CFR 1910.1200

Flammable liquids	Hazard category 2	H225
Caustic burning / irritation of skin	Hazard category 2	H315
Skin Sensitisation	Hazard category 1 B	H317
Specific Target Organ Toxicity - Single exposure	Hazard category 3	H335
Carcinogenicity	Hazard category 1 B	H350

#### 2.2. Label elements

GHS pictogram

Signal word

Danger

-

Page 2 of 18

Hazard statement	Highly flammable liquid and vapour. (H225) Causes skin irritation. (H315) May cause an allergic skin reaction. (H317) May cause respiratory irritation. (H335) May cause cancer. (H350)	
Safety notice (general)	Wear protective gloves/protective clothing/eye protection. (P280)	
Precautionary Statement (Prevention)	Obtain special instructions before use. (P201) Do not handle until all safety precautions have been read and understood. (P202) Keep away from heat/sparks/open flames/hot surfaces No smoking. (P210) Keep container tightly closed. (P233) Ground/bond container and receiving equipment. (P240) Use explosion-proof electrical/ ventilating/ lighting/ equipment. (P241) Use only non-sparking tools. (P242) Take precautionary measures against static discharge. (P243) A void breathing dust/ fume/ gas/ mist/ vapours/ spray. (P261) Wash hands thoroughly after handling. (P264) Use only outdoors or in a well-ventilated area. (P271) Contaminated work clothing should not be allowed out of the workplace. (P272)	
Precautionary Statement (Response)	<ul> <li>IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. (P303 + P361 + P353)</li> <li>IF INHALED: Remove person to fresh air and keep comfortable for breathing. (P304 + P340)</li> <li>IF exposed or concerned: Get medical advice/ attention. (P308 + P313)</li> <li>Call a POISON CENTER or doctor/ physician if you feel unwell. (P312)</li> <li>Specific treatment (see supplemental first aid instructions on this label). (P321)</li> <li>If skin irritation or rash occurs: Get medical advice/ attention. (P333 + P313)</li> <li>Take off contaminated clothing and wash before reuse. (P362)</li> <li>In case of fire: Use dry sand, dry chemical or alcohol-resistant foam for extinction. (P370 + P378)</li> </ul>	
Precautionary Statement (Storage)	Store in a well-ventilated place. Keep container tightly closed. (P403 + P233) Keep cool. (P235) Store locked up. (P405)	
Precautionary Statement (Disposal)	Dispose of contents/container according to the local / regional/national/international waste disposal regulations. (P501)	
Hazardous component(s) for labelling	contains methyl methacrylate 2-ethylhexyl acrylate N,N-dimethyl-p-toluidine	

#### 2.3. Other hazards

#### electrostatic charge

The product is normally supplied in a stabilized form. If the permissible storage period and/or storage temperature is exceeded, the product may polymerize with heat evolution.

#### 3. Composition/information on ingredients

#### 3.1. Substances

----

#### 3.2. Mixtures

#### Hazardous Ingredients

Component	CAS-No.	Content	Hazard class / Hazard category / Hazard statement
methyl methacrylate	80-62-6	30.0 - 60.0 %	Flam. Liq. 2 ; H225 Skin Irrit. 2 ; H315 Skin Sens. 1B ; H317 STOT SE 3 ; H335
2-ethylhexyl acrylate	103-11-7	15.0 - 40.0 %	Flam. Liq. 4 ; H227 Skin Irrit. 2 ; H315 Skin Sens. 1B ; H317 STOT SE 3 (inhalation); H335
N,N-dimethyl-p-toluidine	99-97-8	0.1 - 1.0 %	Flam. Liq. 4 ; H227 Acute Tox. 3 (oral); H301 Acute Tox. 3 (dermal); H311 Acute Tox. 3 (inhalation); H331 Carc. 1B ; H350 STOT RE 2 ; H373

#### 4. First-aid measures

#### 4.1. Description of first aid measures

General advice	Take off all contaminated clothing immediately. Medical treatment is necessary if symptoms occur which are obviously caused by skin or eye contact with the product or by inhalation of its vapours.
Inhalation	Move subject to fresh air and keep him calm. Seek medical advice immediately.
Skin contact	IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before re-use. Contact a doctor immediately.
Eye contact	Rinse thoroughly with plenty of water, also under the eyelids. Seek medical advice immediately.
Ingestion	Do not induce vomiting. Call a physician immediately. Never give anything by mouth to an unconscious person.

#### 4.2. Most important symptoms and effects, both acute and delayed

Page 4 of 18

Excessive or prolonged exposure can cause the following:, Headache, confusion, irritation, Product has dermal defatting effect

#### 4.3. Indication of any immediate medical attention and special treatment needed

No specific antidote known. Symptomatic treatment.

#### 5. Fire-fighting measures

#### 5.1. Extinguishing media

Suitable extinguishing mediafoam, dry chemical, carbon dioxideUnsuitable extinguishing mediaHigh volume water jet

#### 5.2. Specific hazards arising from the chemical

May be released in case of fire: carbon monoxide, carbon dioxide, organic products of decomposition. Closed container may rupture if strongly heated. Vapours may form explosive mixtures with air. Combustible air-vapour mixtures are heavier than the air and spread along the floor. Ignition from a considerable distance is possible.

#### 5.3. Special protective equipment and precautions for fire-fighters

Evacuate enclosed and surrounding areas. As in any fire, wear self-contained breathing apparatus pressuredemand, MSHA/NIOSH (approved or equivalent) and full protective gear. Use water spray to cool containers exposed to fire and disperse vapors. Keep spills away from sources of ignition.

Vapours are heavier than air and can form an explosive mixture with air. Flammable liquid. Vapors can travel to a source of ignition and flash back. Explosive mixtures may occur at temperatures at or above the flashpoint.

Remove all sources of ignition. Also keep emptied containers away from sources of heat and ignition. Keep out unprotected persons. In case of fire, remove the endangered barrels and bring to a safe place, if this can be done safely. Containers exposed to heat (fire) may build up pressure. Cool by splashing with water. Prevent fire extinguishing water from contaminating surface water or the ground water system. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

#### 6. Accidental release measures

#### 6.1. Personal precautions, protective equipment and emergency procedures

Assure sufficient ventilation. Use personal protective clothing. Use breathing apparatus if exposed to vapours/dust/mist/aerosol. Keep away from open flames, hot surfaces and sources of ignition. Vapours can form explosive mixtures with air. Keep out unprotected persons. Avoid spark generation.

#### 6.2. Environmental precautions

Prevent product from getting into drains/surface water/groundwater.

Page 5 of 18

#### 6.3. Methods and materials for containment and cleaning up

Remove sources of ignition and ventilate area. All equipment used when handling the product must be grounded. Absorb spill with inert material and place in a chemical waste container. Obey relevant local, state, provincial and federal laws and regulations. Larger quantities: Remove mechanically (by pumping). Use explosion-proof equipment!

#### 6.4. Reference to other sections

For personal protection see section 8.

#### 7. Handling and storage

#### 7.1. Precautions for safe handling

Safe handling advice Use only trained personnel. Remove contaminated clothing and wash it before reuse. Product is supplied in a stabilized form. Keep locked up. Keep away from heat. Keep away from sparks, flames and other sources of ignition. Use explosion proof equipment. Take precautionary measures against static discharges. Open container carefully as it may be pressurized. Use portable ventilation if necessary at job site. Ground and bond containers when transferring material. The need for grounding and bonding of containers in accordance with OSHA 29 CFR 1910.106 and NFPA 77 should be assessed for all product transfers. Keep container tightly closed. Do not eat, drink, smoke or chew tobacco around material. Use only with adequate ventilation. Avoid breathing vapor or mist. Avoid contact with eyes, skin and clothing. Wash thoroughly after handling. Container hazardous when empty. Emptied container retains vapor and product residue. Follow all MSDS/label precautions even after the container is emptied. Residual vapors might explode on ignition; do not apply heat, cut, drill, grind or weld on or near this container. Keep away from sources of ignition --- No smoking. Vapors are heavier Advice on protection against fire than air. Flammable liquid. Vapors can travel to a source of ignition and and explosion flash back. Explosive mixtures may occur at temperatures at or above the flashpoint. Take precautionary measures against static discharges. Use only explosion-proof equipment. In the event of fire, cool the endangered containers with water. Fire fighting must be carried out from a safe distance.

#### 7.2. Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers
 Keep container closed when not in use. Ensure there is good room ventilation. Limit storage of flammable liquids to approved areas equipped with overhead sprinklers. Protect material from contamination (refer to Section 10 for incompatibilities). Residual vapors might explode on ignition; do not apply heat, cut, drill, grind or weld on or near this container. Do not heat or cut the empty container with electric or gas torch. Keep in the original container at a temperature not exceeding 30 °C (86 °F). Keep away from heat. Keep away from sparks, flames and other sources of ignition. Keep locked up. Fill the container by approximately 90 % only as oxygen (air) is required for stabilisation. With large storage containers make sure the oxygen (air) supply is sufficient to ensure stability.

#### 8.2. Exposure controls

#### **Engineering controls**

Provide general and/or local exhaust ventilation to maintain airborne levels below the exposure limits in Section 8. Refer to the current edition of 'Industrial Ventilation: A Manual of Recommended Practice' published by the American Conference of Government Industrial Hygienists for information on the design, installation, use, and maintenance of exhaust systems.

#### 8.3. Personal protective equipment

Protective measures	Avoid breathing vapor or mist. Avoid contact with eyes, skin and clothing. Wash thoroughly after handling. A safety shower and eye wash fountain should be readily available. To identify additional Personal Protective Equipment (PPE) requirements, it is recommended that a hazard assessment in accordance with the OSHA PPE Standard (29CFR1910.132) be conducted before using this product.
Hygiene measures	Take off all contaminated clothing immediately. Store work clothing separately. Follow the usual good standards of occupational hygiene. Clean skin thoroughly after work; apply skin cream.
Respiratory protection	A respiratory protection program that meets OSHA 1910.134 and ANSI Z88.2 or applicable federal/provincial requirements must be followed whenever workplace conditions warrant respirator use. NIOSH's "Respirator Decision Logic" may be useful in determining the suitability of various types of respirators.
Hand protection	butyl rubber gloves (0.33 mm), Break through time ca. 66 min (EN 374) In practice, due to variable exposure conditions, this information can only be an aid to orientation for the selection of a suitable chemical protection glove. In particular, this information does not substitute suitability tests by the end user.

Splash protection	nitrile rubber gloves (minimal thickness 0.11 mm)
General information	Gloves should be replaced regularly, especially after extended contact with the product. For each work-place a suitable glove type has to be selected.
Eye protection	Use safety glasses (ANSI Z87.1 or approved equivalent).
Skin and body protection	Use chemically resistant apron or other impervious clothing to avoid prolonged or repeated skin contact.

#### 9. Physical and chemical properties

#### 9.1. Information on basic physical and chemical properties

Colour Form Odor	colourless, turbid liquid ester-like
Odour Threshold	<1 ppm
physical state	liquid
Melting point/freezing point	no data available
Boiling point/range	ca. 100 °C (1,013 hPa) ca. 212 °F
Flash point	10 °C (DIN 51755) (methyl methacrylate) 50 °F
Evaporation rate	> 1 (butyl acetate = 1)
Ignition temperature	430 °C (DIN 51794) (methyl methacrylate) 806 °F
Autoignition temperature	no data available
Decomposition temperature	This product is stable under normal storage conditions.
Impact Sensitivity	Not impact sensitive.
Lower explosion limit	2.1 %(V) at 10,5°C / 33,8°F(methyl methacrylate)

**DEGAROUTE® 460 Binder Resin** 

Page 11 of 18

Upper explosion limit	12.5 %(V) (methyl methacrylate)
Flammability (solid, gas)	no data available
Vapour pressure	ca. 40 hPa (= mbar) at 20 °C / 68 °F
Density	0.97 g/cm3 at 20 °C / 68 °F (DIN 51757)
Relative density	no data available
Relative vapour density (related to air)	> 1 (20 °C) (68 °F)
Solubility in water	ca. 20 g/l at 20 °C / 68 °F
Fat solubility Solubility (quantitative)	no data available no data available
Solubility (qualitative)	no data available
рН	no data available
n-Octanol/water partition coefficient	no data available
Viscosity (dynamic)	ca. 230 mPa·s at 23 °C / 73 °F (Brookfield )
Viscosity (kinematic)	no data available

#### 9.2. Other information

none

#### 10. Stability and reactivity

#### 10.1. Reactivity

see section 10.2.

#### 10.2. Chemical stability

This product is stable under normal storage conditions.

#### 10.3. Possibility of hazardous reactions

Page 12 of 18

Polymerization with heat evolution may occur in the presence of radical forming substances (e.g. peroxides), reducing substances, and/or heavy metal ions. Vigorous polymerization is possible when heated /exposed to heat.

#### 10.4. Conditions to avoid

Avoid high temperatures and sources of ignition.Ultraviolet light. The product is normally supplied in a stabilized form. If the permissible storage period and/or storage temperature is exceeded, the product may polymerize with heat evolution.

#### 10.5. Incompatible materials

Peroxides, amines, sulfur compounds, heavy metal ions, alkalis, reducing agents and oxidizing agents.

#### 10.6. Hazardous decomposition products

None when used as directed.

#### 11. Toxicological information

#### 11.1. Information on toxicological effects

toxicokinetics, metabolism and distribution	no specific test data available	
Acute Oral Toxicity	LD50 rat, OECD 401	> 5,000 mg/kg
	Related to substance: methyl methacrylate LD50 rat	> 2,000
	Related to substance: 2-ethylhexyl acrylate	mg/kg
Acute Inhalational Toxicity	LC50 rat, 4 h Related to substance: methyl methacrylate	29.8 mg/l
	LCLo Mouse Related to substance: 2-ethylhexyl acrylate	0.6 mg/l
Acute Dermal Toxicity	LD50 rabbit	> 5,000 mg/kg
	Related to substance: methyl methacrylate	> 5,000
	Related to substance: 2-ethylhexyl acrylate	mg/kg

Legend ACC	American Chemistry Council	
ACGIH	American Conference of Governmental Industrial Hygenists	
ACS	Advisory Committee on Sustainability	
ADI	Acceptable Daily Intake	
ASTM	American Society for Testing and Materials	
ATP	Adaptation to Technical Progress	
BCF	Bioconcentration factor	
BOD c.c.	Biochemical oxygen demand closed cup	
CAO	Cargo Aircraft Only	
Carc	Carcinogen	
CAS	Chemical Abstract Services	
CDN	Canada	
CEPA CERCLA	Canadian Environmental Protection Act	
CFR	Comprehensive Environmental Response – Compensation and Liability Act Code of Federal Regulations	
CMR	carcinogenic-mutagenic-toxic for reproduction	
COD	Chemical oxygen demand	
DIN	German Institute for Standardization	
DM EL DNEL	Derived minimum effect level	
DOT	Derived no effect level Department of Transportation	
EC50	half maximal effective concentration	
EPA	Environmental Protection Agency	
ErC50	Reduction of Grow th Rate	
ERG FDA	Emergency Response Guide Book	
GHS	Food and Drug Administration Globally Harmonized System of Classification and Labelling of Chemicals (GHS)	
GLP	Good Laboratory Practice	
GMO	Genetic Modified Organism	
HC S	Hazard Communication Standard	
HMIS	Hazardous Materials Identification System	
IARC	International Agency for Research on Cancer	
IATA IBC	International Air Transport Association Intermediate Bulk Container	
ICAO-TI	International Civil Aviation Organization- Technical Instructions	
ICCA	International Council of Chemical Association	
ID	Identification number	
IMDG	International Maritime Dangerous Goods	
IUPAC ISO	International Union of Pure and Applied Chemistry International Organization For Standardization	
LC50	50 % Lethal Concentration	
LD50	50 % Lethal Dose	
L(E)C50	LC50 or EC50	
	Low est observed adverse effect level	
LOEL MARPOL	Low est observed effect level International Convention for the Prevention of Pollution from Ships	
NFPA	National Fire Protection Association	
NOAEL	No observed adverse effect level	
NOEC	no observed effect concentration	
NOEL	no observed effect level	
o.c. OECD	open cup Organisation for Economic Cooperation and Development	
OEL	Occupational Exposure Limit	
OSHA	Occupational Safety and Health Administration	
PBT	Persistent, bioaccumulative, toxic	
PEC	Predicted effect concentration	
PNEC	Predicted no effect concentration	
RQ SDS	Reportable Quantity Safety Data Sheet	
STOT	Specific Target Organ Toxicity	
UN	United Nations	
vPvB	very persistent, very bioaccumulative	
VOC	volatile organic compounds	
WHMIS WHO	Workplace Hazardous Materials Information System World Health Organization	
	wond noallt Organization
